User Role Distribution

User Distribution by Role

STRATEGIC INSIGHTS & ANALYSIS

Data-driven performance observations

1. EXECUTIVE PERFORMANCE OVERVIEW

TicketFlicks generated INR 8,781 in platform revenue. With an average revenue per user of INR 878 across 22 registered users, the platform demonstrates a solid foundation. Key operational metrics indicate consistent user engagement, though overall volume remains constrained by current catalogue depth of 8 active movies.

2. REVENUE & CONVERSION ANALYSIS

The platform achieved a booking conversion rate of 33.3%. This indicates the proportion of initiated transactions resulting in successful payments. Examining revenue distribution across venues, the platform averages INR 976 per active theatre, highlighting the baseline geographical monetisation performance.

3. USER BEHAVIOUR & ENGAGEMENT

Transaction data reveals an average of 2.0 seats booked per order. This group-booking tendency suggests that users primarily utilise the platform for shared social experiences. Customer lifetime value indicators reflect moderate retention, forming a baseline for future targeted re-engagement campaigns.

4. OPERATIONAL EFFICIENCY

Current platform operations show varying degrees of efficiency across physical and digital touchpoints. By focusing purely on existing data traces, it is evident that increasing the conversion rate from 33.3% represents the most immediate lever for revenue expansion without requiring proportional increases in user acquisition spending.
